H. BOOK REVIEW

1. For the first time since 1948, the British capital will host the summer Olympic Games. It was the fourth participation of Britain in the battle to host the games after failed attempts of Birmingham for the 1992 Olympics and Manchester for 1996 and 2000. “I’m looking forward to what I’m sure will be a fantastic Olympic Games,” said Prince William.

2. There are many factors, both social and psychological, which influence the roles of teachers and learners in the classroom. The book “Roles of Teachers and Learners” by Tony Wright helps teachers to understand these roles. And the ways in which co-operative learning may best be fostered.

3. It’s calculated that Joanne Rowling, the author of very famous books about Harry Potter, is earning \$36,000,000 daily and her total profit is already more than \$1,000,000,000.

4. In 2005 “ Harry Potter and the Half-Blood Prince” broke the previous record of Potter series itself as well as all other records had ever held by freshly published books: more than 8.9 million copies had been sold within 24 hours since the moment of release.

5. The word “hamburger” comes from the name of the German city Hamburg and not from the word “ham”, and so the word “cheeseburger”, sometimes used to mean a similar kind of sandwich with cheese instead of meat, is based on a false analogy.

6. Reading works of literature gives students an insight into the variety of ways language has been handled over the last three centuries. It is both rewarding and motivating for learners to discover they can understand the language, and that they can even enjoy the experience of reading an English or American classic.

7. The world’s famous cycling race comes to its exiting conclusion when the riders cap off three weeks of road racing and 21 stages with a sprint down the Champs Elysees in Paris. The Tour de France will be broadcast live daily at Sport land at 5 p.m. until the last stage on Sunday, June 24.

Задание 2.

Прочитайте тексты и установите соответствие между текстами A–G и заголовками 1–8. В ответ запишите цифры, в порядке, соответствующем буквам. Используйте каждую цифру **только один раз**. В задании есть **один лишний заголовок**.

- 1. International space team
- 2. A new kind of tourism
- 3. What to wear in space
- 4. Space station equipment
- 5. The problem with closed spaces
- 6. Down-to-Earth training for space
- 7. Early space projects
- 8. Space garbage

A. People have always dreamt about space travel and space discoveries. For the first time the dream came true when the unmanned satellite Sputnik was launched and scientists got the first photos of the Earth from outer space. However, the real breakthrough happened in 1961 when the first human, Yuri Gagarin, left our planet on the spacecraft Vostok and completed a full Earth orbit.

B. Since then lots of people have volunteered for space missions but few are able to meet the strict requirements for candidates. Still on the Earth, the future astronauts do tests in simulated environments and solve problems they are supposed to face during the flight. They get ready physically and psychologically for different situations. They also practise how to operate the complicated space equipment and what to do in an emergency.

C. Even wearing a spacesuit requires special skills. The main idea of the suit is to keep the person alive in outer space, during launch and landing, when the pressure on the body increases dramatically, or inside the space station, if something goes wrong. The suit is made from hard materials, contains its own oxygen supply and has lots of smart devices monitoring the condition of the astronaut.

D. Obviously, no device can completely eliminate the risk of space travel - it will always be a dangerous activity, but it attracts people anyway. They are ready to pay big money for an out-of-this-world experience and the number of such people is constantly increasing. There are already business projects for space tours and designs for space stations stuffed with equipment for entertainment instead of scientific experiments.

E. Not everyone supports the idea of idle space tourists, and there are reasons for this. Apart from unnecessary risk, it can add to the problem of space pollution. People have only started going into orbit very recently but they have already managed to leave lots of evidence of their existence there - parts of old spacecraft and satellites are circling the Earth. Scientists say that if this increases, it may cause serious problems and dangerous situations.

F. Nowadays, countries find it useful to combine their efforts when carrying out space exploration projects. The best engineers from all over the world participate in designing crafts and equipment, and astronauts working on the space station may be of different nationalities and background

Theoretically speaking, it might cause some misunderstanding and culture clashes, but in practice this never happens.

G. Long space missions, however, are going to be a great challenge to the flight team whatever nationality they are. The astronauts will have to communicate only with each other and there will be no opportunity to escape unpleasant people. Psychologists believe that stress is a serious risk factor for the planned expedition to Mars.
